3. Agency Historical Review Program. Discussions and preparations continue on the Agency's Historical Review Program. In particular, on 29 January, D/OIS, DD/OIS, the Agency Historian, and C/CRD reviewed topics to be discussed at a meeting scheduled to be held with the Archivist of the United States. Representatives will include the Agency Historian and OIS senior officials. In addition, CRD examined three areas during this reporting period:

OSS Film. There are still approximately 62 cubic feet at the Agency's Archives and Records Center (AARC), six cubic feet to be destroyed, nine cubic feet unidentified, six cubic feet ready for transfer to NARS, and 41 cubic feet to be retained in AARC.

1945-1949 documents. A DARE listing of documents published between 1945 and 1949 showed 6,600 documents which had been declassified under the systematic review program. Many of these were substantive documents produced by the old ORE and OO offices. Included were estimates, surveys, monographs, and many current intelligence reports on events of the time.

Guidelines. Procedures used in the old systematic review program were examined for applicability to historical review. Depending on the amount of information desired to be recovered from the file, many DARE procedures will be useful in the new program.

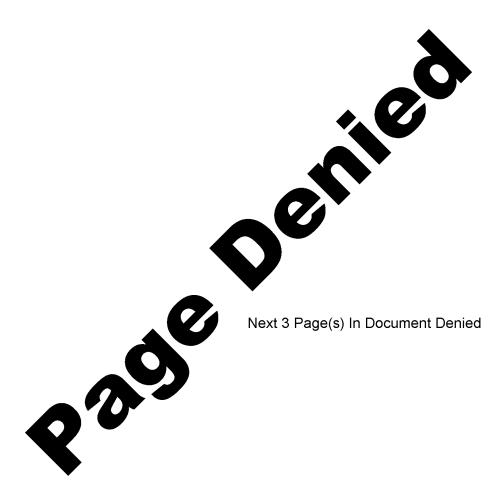

B. SIGNIFICANT EVENTS AND ITEMS OF INTEREST

1. Computer Support. IRMD has been providing special programming and procedural support to the Information Privacy Division (IPD) over the past few weeks. Procedures were rewritten to provide IPD personnel with accurate and easy-to-read displays of the division's annual activities to make easier the preparation of the Agency's annual report to Congress on FOIA. Procedures for moving old data from IPD's on-line history file to an off-line data base were also updated. In addition, help was provided to IPD in moving several years of material from this history file to the off-line data base. Instruction was given IPD personnel in order that they will be able to perform the functions in the future.

- 2. Machine Readable Records. Representatives from the Information Resources Management Division (IRMD) met with the DA Records Management Officer and the DA office RMOs to discuss the requirements and procedures to follow in drafting office machine-readable records control schedules. Each RMO was provided with a list of the major automated information systems which is to be reviewed by the office ADP control officer for additions or corrections. These meetings are being held to prepare for the scheduling of DA machine readable records.
- 2. Records Inventory. IRMD completed its work on the Agency's Annual Report of Records Holdings for 1984 and prepared a report for D/OIS. Copies of the final report will be distributed to the Directorate RMOs. The IRMD referent will brief the Directorate RMOs and solicit their views on ways to improve future inventories.
- 4. Component Surveys. A memorandum has been sent to the Director of Research and Development, DS&T, requesting that OIS be allowed to conduct an information handling and records management survey of his office. Chief, IRMD, will be contacting the Director of ORD to schedule a meeting to discuss the survey.
- 5. Micrographics Training. The Introduction to Micrographics Seminar conducted under OIS sponsorship during 22-24 January 1985 was very successful. The contract instructor who conducted the seminar was knowledgeable and professional in his presentations and made a favorable impression on the class. His use of practical exercises requiring student assessments of potential micrographics applications was particularly useful. All students said that the course objectives were definitely achieved.

PROGRESS ON ACTION ITEM #2:

In preparation for the Historical Review Program, CRD examined three areas during the week:

OSS Film--Found there were still about 62 cubic feet at six cubic feet to be destroyed, nine cubic feet unidentified, six cubic feet ready for transfer to NARS, and 41 cubic feet which will have to be retained in CIA. One hundred sixty-four reels of OSS film had been transferred to NARS in 1975.

1945-1949 Documents—A DARE listing of documents published between 1945 and 1949 showed 6,600 documents which had been declassified under the systematic review program. Many of these were substantive documents produced by the old ORE and 00 offices. Included were estimates, surveys, monographs, and many current intelligence reports on events of the time.

Guidelines--Procedures used in the old systematic review program were examined for applicability to historical review. Depending on the amount of information desired to be recovered from the file, many DARE procedures will be useful in the new program.

d. Ames Building Information Services Center. DD/OIS, Chief, IRMD,
Chief, Information Control Branch, and
Chief, Information Services Center, met with Chief,
Administrative Staff, Intelligence Community Staff, and
IC Staff RMO, to discuss IC Staff participation in the Ames Building
ISC. IC Staff had been reluctant to commit an individual to work in the
Ames Center on a full-time basis because of residual services that
needed to be carried out for staff elements at Headquarters. DD/OIS
stated that the IC Staff could receive only mail service from the center
unless the staff could provide someone to work there full time. After
considerable discussion, agreed to supply this type of
staffing provided the center absorb the residual pouching requirement at
Headquarters. was charged with determining if the IC
Staff needs could be met and report back to DD/OIS on the results of his
discussions with
419049919 #14
e. Component Surveys. Chief and Deputy Chief, IRMD,
Chief, ICB, and Personnel, met with
an Agency retiree, to discuss her availability to
work as an OIS annuitant in implementing the recommendations of an OIS
survey report. Because of her previous Agency background in records
management, and her in-depth knowledge of the DI, was
identified as the appropriate person to work with the OIA Records
Management Officer in implementing the recommendations. OIA had
requested OIS assistance in identifying an annuitant for this follow-up
action. expressed her interest in taking on this type of
assignment and OIA has been notified of her willingness.
A memorandum was sent to the Director of Research and Development,
DDS&T, requesting that OIS be allowed to conduct an information handling
and records management survey of his office. Chief, IRMD, will be
contacting the Director of ORD to schedule a meeting to discuss the
survey.

a. OSS Records. The request for transfer of 255 cubic feet of OSS
records submitted to the National Archives and Records Service (NARS) in
November has been approved. NARS delayed approval of this request
pending completion of exterior security renovations at the Archives.
The physical transfer of these records is expected to be made during the
first week in February. This transfer will bring to 563 cubic feet the
amount of OSS material transferred to NARS.

- graffing of Decords	Center. Chief, Information
c. Staffing at Records	, Management and Planning Group, IMS, and
Denuty Branc	th Chief, met with Chief and Deputy Chief,
IRMD, Chief, IM	
Center Branch, and	, IMB, concerning the possibility of
assigning a DO officer to t	the Records Center to service DO records.
indicated that	the volume of DO requests for records (1,00
a month) and the DO's desir	e to have more requests serviced on a fold
or document basis required	assignment of a DO officer there. He also
felt that it was inefficien	nt for the DO to send someone to the center
an ad hoc basis to meet oth	mer needs, such as servicing 201 files, viterial, etc. He indicated that the DO would
records, consolidating mate	lish a new position at the center or provid
and of the own to accommoda	ate a DO officer. IRMD representatives
responded that the best Way	to meet these needs would be for the DO t
clear Records Center employ	rees for access to its material. IRMD
personnel also explained th	nat this type of arrangement could create
management problems at the	center and detract from the concept of a
centrally operated records	facility. agreed that he woul
discuss the possibility of	clearing a Records Center employee with IM
	sentatives would discuss the DO proposal wi
DD/OIS.

- 2. The number of issuances received for processing in the Division during the week nearly doubled over the previous week. Of the 11 received, those that stand out are: two notices announcing appointments to key positions in the Administration and Intelligence Directorates; a notice on employee integrity; a bulletin in the health area outlining OMS' mammography screening program; and an SIS notice reflecting the new SIS pay rates which were effective on 6 January 1985. (A-IUO)
- second session (see Weekly Report of 11 December 1984 for description of the first meeting) with RPD members to demonstrate further the feasibility of communicating via the WANG 7525 (stand-alone) system with our coordinators and initiators of regulatory issuances. To display the capability of the system the ODP visitors sent a document via WANG to a laser printer in the office of the DDA as well as to P&PD. ODP offered and RPD accepted training under ODP auspices of selected members of our staff in the mechanics of communicating with additional offices. (A-IUO)
